9:40-10:05 a.m. [Cody Buntain](#), NYU/NJIT

10:05-10:30 a.m. [Junpei Zhou](#), CMU Informedia

# Incident Streams 2020

---

# Planned Changes for 2020

---

## Data

- The volume of tweets per event released to participants is likely to increase
- The method for downloading the tweets may change (we are in talks with Twitter for providing data)

## Timeline

- We will be moving to run pooling from systems this year, rather than relying on organiser pre-filtering (this means that submissions for each edition will be earlier in the year)

## Mid-Year Workshop

- We are planning a Mid-year workshop in collaboration with NIST's Public Safety Communications Research Division

# Planned Changes for 2020

---

## Tasks and Metrics

- The task will stay broadly similar to this year, however, the Survey will have some options for alterations – so make sure you fill it in!
- The metrics will also likely to stay the same

We will be making a call for a joint Journal paper on lessons learned from the first 2 years of the track.
